

CORPORATE SOCIAL RESPONSIBILITY

CSR

Sustainability has been our top priority for 20 years.

We take into consideration the next generations, our customers, our employees and our manufacturing partners.

Together, they constitute the foundation of a solid CSR policy within Pakform.

OUR VALUES

Committed, reliable and loyal; our three core values are second nature to us.

These values show who we are, how we work, how we deal with you as a customer and how we work with our manufacturing partners. In brief, they show where we stand in society as an organisation.

Our dedication, reliability and loyalty have made us who we are: a market leader in thermoforming.

We are proud of this accomplishment !

PEOPLE PLANET PROFIT

For Pakform Corporate Social Responsibility means doing business with an approach that is trying to bridge the gap between economic benefits and non-economic benefits (people and planet).

Pakform's sustainability policy is embracing this "people, planet, profit" model from John Elkington. Please see how we balance our business in such a way that we take care of our future generations.

PEOPLE

- Sustainable staffing policy (opportunities for growth and training), retaining employees for a longer period of time. To substantiate that we have succeeded in this respect is apparent from the fact that, on average, our employees currently work for us for over 10 years.
- Long-term relationships with suppliers. We have been working with the same partners for many many years. This is a symbiotic relationship. We are growing together!
- We strive for long-term relationships with our customers. This partnership already goes beyond simply delivering goods and services.
- A safe and healthy working environment. We feel responsible for the well being of our employees.

PLANET

Pakform is always thinking in the long term and considers our future generations. We try to save our Planet as much as possible.

Below some of our activities in this field:

- We continuously improve our packaging for our customers so that fewer resources are needed. To produce a packaging with less material but to the same specifications needed is an on-going challenge. Pakform is ISO 14001 certified.
- we use 80% of recycled raw materials for the production of our packaging

PROFIT

Almost all profits are reinvested in the company. The owners of the Paform have a long term vision where the well being of the company and its employees is first priority.

Below are some of our activities in this field:

- The result is used to further develop our factory
- We have an excellent D&B credit rating; this gives both our customers and our suppliers the confidence that we will fulfill our obligation, even in the distant future.
- Pakform doesn't just aim to improve the working and living conditions of our own employees and those of our manufacturing partners. We also like to act from a broader perspective. That is why Pakform supports organizations such as the noble package

EQUAL CHANCE

Equal chances for everyone Pakform doesn't just aim to improve the working and living conditions of our own employees and those of our manufacturing partners.

We also like to act from a broader perspective. That is why Pakform supports local charity organisation noble

RECYCLING

Pakform for the production of its packaging.
It covers linings that are 80% recycled
