

## ENVIROMENT AND QUALITY POLICY

In order to meet the individual requirements of our clients, we provide them with high quality products and services, proposing unconventional solutions, modern machinery park and commitment of the whole team.

Taking care of getting full satisfaction of our clients, we develop and constantly improve our business, distinguishing us on the packaging market the highest quality of a varied assortment, competitive price and quick response to the changing needs of customers and the market.

Implementing services for our clients we attach great attention to our impact on the natural environment, through the use of ecological technologies, minimizing the consumption of raw materials, natural resources, waste generation and secondary raw materials.

For twenty years we successfully operate on the packaging market by producing packaging from plastic thermoformed vacuum and we offer confectioning services.

We deliver them on the agreed date with high standards, carefully selecting raw materials and semi-finished products from proven suppliers. We offer comprehensive assistance at every stage of partnership cooperation.

Responsibility for quality and the natural environment it rests on everyone together and each one separately. Our daily tasks belong to removing the causes of errors, avoiding potential mistakes and constant improvement of all processes. At every stage of our work we care about the natural environment.

We are constantly improving our system, we supervise it and we effectively implement quality and environmental goals. During the implementation of tasks we meet legal requirements.

The quality and environmental policy has been disseminated in the company and it applies to all its employees. We work based on developed documents which we improve and we raise the qualifications of employees.
